

# MARCH 20, 2020 SUSTAINABLE AQUACULTURE

## Lunch at Pierson Family Restaurant & Evans Fish Farm Tour

The Evans Fish Farm located in Pierson is home to the first farm to raise Russian sturgeon in the US. The Evans family pioneered state-of-the-art sustainable aquaculture of sturgeons at their 100-acre farm. They now sell “Anastasia Gold” a premium caviar that rivals what comes from the Caspian Sea without affecting the wild resource from one of the few commercial sturgeon farming operations in the Western Hemisphere. Come join us for lunch and a guided tour of the Evans Fish Farm facility.
