

Marine Discovery Center Environmental Boat Tour

Join us for an afternoon dolphin and estuary tour onboard the pontoon boat, *Discovery*. Get a chance to view estuary wildlife from a unique perspective on the water. The tour gives insightful information about the types of estuary projects that are under the auspices of the Marine Discovery Center, including oyster bed restoration, sea grass planting and water quality projects. The MDC's mission is "to protect and restore the Florida coastal and Indian River Lagoon ecosystems through education, research and community stewardship".
